MASTER OF ARTS IN SPECIAL EDUCATION

The Masters of Arts (MA) in Special Education is designed for a broad range of professionals (e.g., general or special education teachers, graduates in related fields) to provide in-depth learning and experiences related to supporting children and adults with disabilities and at risk for learning and behavioral difficulties.

The MA program provides programs of study in three specialization areas with nationally known faculty researchers: 1) School-Wide Positive Behavior Supports positive behavior supports, 2) Literacy Supports, and 3) Transition and Postsecondary supports. Students may also design an individualized program of study in collaboration with their advisor.

The MA in Special Education is for special or general educators who:

- Want advanced specialized knowledge and skills in positive behavioral supports, literacy supports, or transition and postsecondary supports;
- Are interested in increasing the breadth and depth of their knowledge and skills in supporting the increasingly diverse learning needs of students in today’s classrooms;
- Want to support all students, including students with disabilities and at risk for learning and/or behavior difficulties, in a variety of classroom settings within a Response to Intervention (a.k.a. SRBI in CT) framework.

SPECIFIC AREAS OF INTEREST

For information about specific areas of interest, please contact the following respective faculty.
